

Q1: When TypeScript is installed, it will be part of the \_\_\_\_\_ section of package.json.

- A) ☒ Correct Answer: C  
A) dependencies  
B) scripts  
C) devDependencies  
D) main

Q2: Which tag is used to refresh web pages at specific intervals?

- A) ☒ Correct Answer: C  
A) <link>  
B) <style>  
C) <meta>  
D) <script>

3: \_\_\_\_\_ is the navigational component that helps to emphasize the current location of a webpage within the hierarchy of pages.

- A) ☒ Correct Answer: C  
A) Navbar  
B) Sidebar  
C) Breadcrumb  
D) Dropdown

4: \_\_\_\_\_ is used to highlight content in Bootstrap.

- A) ☒ Correct Answer: C  
A) <strong>  
B) <em>  
C) <mark>  
D) <span>

5: What is the purpose of the class attribute in HTML?

- A) ☒ Correct Answer: C  
A) It defines the ID of an element  
B) It adds inline JavaScript to an element  
C) It assigns one or more class names to an element for styling or scripting  
D) It sets the element's position on the page

6: Which of the following are valid rules for defining variables in TypeScript?

- A) ☒ Correct Answers: A, D, E  
A. Variable names can start with a letter, underscore `_`, or dollar sign `$`  
B. Variable names can contain spaces  
C. Reserved keywords can be used as variable names  
D. Variable names are case-sensitive  
E. Variables can optionally be typed using TypeScript type annotations

7:Which of the following is a valid operation to get rounded corners in CSS?

A) ☒ Correct Answer: D

- A) border-shadow
- B) border-style
- C) corner-radius
- D) border-radius

8:Which of the following are valid CSS border properties?

A) ☒ Correct Answers: A, B, C, D

- A. border-color
- B. border-style
- C. border-width
- D. border-radius
- E. border-background

9:Which of the following is NOT a keyword in JavaScript?

A) ☒ Correct Answer: E

- A. let
- B. class
- C. const
- D. function
- E. variable
- D. Var

10:Why would you include "use strict" in a JavaScript file?

A) ☒ Correct Answer: B

- A. To allow the use of undeclared variables without errors
- B. To prevent the use of duplicate parameter names in functions
- C. To allow the use of with statement without errors
- D. To make this always refer to the global object (window)
- E. To improve performance by removing all error checks

11:Which of the following are valid syntaxes to assign functions in JavaScript?

A) ☒ Correct Answers: A, B, C

- A. function myFunction() { console.log("Hello"); }
- B. let myFunction = function() { console.log("Hello"); };
- C. let myFunction = () => { console.log("Hello"); };
- D. let myFunction() = { console.log("Hello"); };
- E. function = myFunction() { console.log("Hello"); }

12:Which of the following keywords define the scope and behavior of a variable in JavaScript?

A) ☒ Correct Answers: A, B, C

- A. let

- B. const
- C. var
- D. function
- E. class

13: Which of the following statements is true about the let keyword in JavaScript?

A) ☒ Correct Answer: A

- A. A variable declared with let can be updated but not redeclared within the same scope.
- B. A variable declared with let can be updated and redeclared within the same scope.
- C. A variable declared with let can neither be updated nor redeclared.
- D. A variable declared with let can be updated, redeclared, and reassigned within the same scope.

14: JavaScript statements are composed of which of the following?

A) ☒ Correct Answer: A

- A) Values, operations, expressions, keywords, and constructors
- B) Tags, selectors, styles, functions
- C) Classes, elements, IDs, scripts
- D) Databases, loops, SQL, APIs

15: \_\_\_\_\_ member is visible only to subclasses of the class containing the member.

A) ☒ Correct Answer: C

- A) public
- B) private
- C) protected
- D) readonly

16: Which one of the following is not a primitive type in TypeScript.

A) ☒ Correct Answer: D

- A) string
- B) boolean
- C) number
- D) object
- E) undefined

17: What is the keyword used to implement interfaces in TypeScript?

A) ☒ Correct Answer: D

- A) extends
- B) include
- C) interface
- D) implements

18:When TypeScript is installed, it will be part of the \_\_\_\_\_ section in the package.json file.

- A) ☒ Correct Answer: B  
A) dependencies  
B) devDependencies  
C) scripts  
D) main

19:Which of the following members can be included in a TypeScript class?

- A) ☒ Correct Answer: E  
A) Properties  
B) Constructors  
C) Methods  
D) Access Modifiers (public, private, protected)  
E) All of the above

20:Which keyword is used to call the base class constructor in TypeScript?

- A) ☒ Correct Answer: B  
A) base  
B) super  
C) this  
D) extends

21:Which command will create a new package.json file?

- A) ☒ Correct Answer: C  
A) npm install  
B) npm start  
C) npm init  
D) npm update

22:Which package is needed to compile TypeScript from the command line?

- A) ☒ Correct Answer: A  
A) typescript  
B) ts-node  
C) ts-loader  
D) babel

23:How can you change the color of the first letter in a paragraph using CSS?

- A) ☒ Correct Answer: C  
A) p:first-letter { color: red; }  
B) p:firstLetter { color: red; }  
C) p::first-letter { color: red; }  
D) p:first-letter() { color: red; }

24:Which of the following will define the scope of a variable in JavaScript?

- A) ☒ Correct Answer: A
- A) The let, const, and var keywords
  - B) The function keyword
  - C) The class keyword
  - D) The return statement

25:Which command is used to uninstall TypeScript from your project?

- A) ☒ Correct Answer: B
- A) npm remove typescript
  - B) npm uninstall typescript
  - C) npm delete typescript
  - D) npm uninstall -g typescript

26:What does the <meta name="..."> tag represent in HTML?

- A) ☒ Correct Answer: A
- A) It is used to define metadata such as the author or description of the page.
  - B) It is used to create a table of contents for the page.
  - C) It is used to insert external stylesheets.
  - D) It is used to define the character encoding of the document.

27:Which command is used to create a package.json file in a Node.js project?

- A) ☒ Correct Answer: C
- A) npm start
  - B) npm install
  - C) npm init
  - D) npm create

28:How do you call the constructor from the base class in TypeScript?

- A) ☒ Correct Answer: A
- A) super()
  - B) this()
  - C) base()
  - D) parent()

29: Why does the following code return NaN?

```
function sum(p = 10, q) {  
  return p + q;  
}  
sum(10);
```

- A) ☒ Correct Answer: A
- A) The parameter q has a default value of undefined, which results in NaN when added to p.
  - B) The function does not return a value by default.
  - C) The default value for p is not properly set.

D) The function is missing the return statement.

30:What will be the result of calling `func(10, "hello", true)` in the following function?

```
function func(p, ...q) {  
  return p + q;  
}
```

A) ☒ Correct Answer: B

A) 10hello,true

B) [10, "hello", true]

C) 10hello

D) NaN

31:What does the following TypeScript function signature represent?

```
function example(input: string | string[]): void {  
  // function body  
}
```

A) ☒ Correct Answer: C

A) String

B) Array of strings

C) Union type

D) Multiple types

32:Which package is used to compile TypeScript?

A) ☒ Correct Answer: B

A) tsc

B) typescript

C) ts-node

D) babel

33:How is inheritance implemented in a TypeScript class?

A) ☒ Correct Answer: B

A) By using the `super` keyword only

B) By using the `extends` keyword to inherit from a base class

C) By using the `extends` keyword with the `super()` constructor

D) By using the `import` keyword to bring in the class

34:Which of the following access modifiers allows a member to be accessible within the class and derived classes in TypeScript?

A) ☒ Correct Answer: C

A) `public`

B) `private`

C) `protected`

D) `static`

35:What is the correct syntax to define an interface in TypeScript?

A) ☒ Correct Answer: A

- A) interface interface\_name {}
- B) interface {interface\_name}
- C) interface\_name: {}
- D) interface {}

36:What will the following code return when function(10) is called?

```
function example(p, q = 20) {  
  return p + q;  
}  
example(10);
```

- A) ☒ Correct Answer: C
- A) 10
- B) 20
- C) 30
- D) undefined

37:How can you add a background color to a <p> tag in CSS?

- A) ☒ Correct Answer: B
- A) p { background: color; }
- B) p { background-color: red; }
- C) p { color: red; background: green; }
- D) p { background-color: color; }

38:How many columns will be created for the content?

```
width: 600px;  
column-width: 200px;  
column-gap: 50px;
```

- A) ☒ Correct Answer: B
- A) 2
- B) 3
- C) 4
- D) 5

39: What does the CSS selector h1 + p {} target?

- A) ☒ Correct Answer: B
- A) All <p> tags within an <h1> tag
- B) The first <p> element immediately after any <h1> element
- C) All <p> tags in the document
- D) The <h1> tag and all its adjacent <p> tags

40: What does the CSS selector h1 ~ p {} target?

- A) ☒ Correct Answer: C
- A) The first <p> element immediately after any <h1> element
- B) All <p> elements within an <h1> tag
- C) All <p> elements that are siblings of an <h1> element, anywhere after it
- D) Only the <h1> and its adjacent <p> elements
